

# Wear Protection

MetaLine Repair and Coating Systems

## Blasting technology

Coatings applicable by spraying and trowel for repairing existing rubber linings or for recoating wear-impinged components. Extremely impact-resistant and durable

- Shot blasting booths (dry / wet / medical)
- Blasting baskets
- Cyclones / blasting grit recirculation
- Turntables
- Blasting templates
- Component mounts
- Blasting suspensions

- 1 Seamless protective lining – no borderline penetration / no detaching
- 2 Offers protection to any geometry – like rubberplates but without seams
- 3 Wear-resistant coated workpiece blasting carrier
- 4 Blasting cabin sprayed in accordance with medical standard (FDA)
- 5 Rotary disk with an 8 mm thick seamless protective skin
- 6 Blasting suspensions coated for the protection of sensitive parts
