

Hygiene Optimization

MetaLine Repair and Coating Systems

Pharmaceutical / Medical Engineering

Sprayable elastomeric coatings with approval according to FDA 177.1680 (Title 21). Impact-resisting, absolutely seamless, gentle to the materials to be conveyed and sterilizable

- Shipping containers
(prevention of black discoloration)
- Dosing devices (sound deadening)
- Packaging machines
- Feeding trays
- Rupture separation sections
- Sampling apparatus / removing tools
- Weighing devices
- Mixer / Feeder

- 1 Seamless coatings facilitate cleaning
- 2 Rupture separation section rubberized in liquid form with FDA approval
- 3 Coated NFe filling module prevents black staining
- 4 Metal-free elastomerically coated agitator with non-stick effect
- 5 Coated feeding hopper of a packaging machine
- 6 "Elastomeric" spiral conveyor protects sensitive ingredients
