

Function Protection

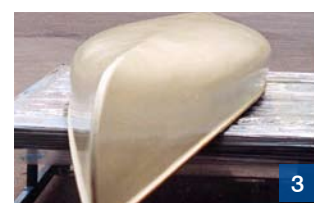

MetaLine Repair and Coating Systems

Orthopedics Sports Equipment

Coatings to be applied by spraying and brushing for the elastomeric arrangement of functional surfaces. Variable static friction, very decorative, easy to clean, waterproof and extremely reliable

- Orthopedic pillows (seal)
- Sports prostheses (protection from injuries)
- Wheelchair drive rings
- Shoulder pads (sports rifles)
- Watersports equipment
- Masks / film requisites

- 1 *MetaLine fits like a second skin – only more reliable*
- 2 *Elastomeric coatings protect and optimize prostheses*
- 3 *MetaLine repairs and protects plastic surfaces*
- 4 *Sports equipment become easy to grip and appealing with MetaLine*
- 5 *Seat after over-coating – almost as good as new*
- 6 *MetaLine 795 to improve dry gliding behavior*
