

# Scratch Protection

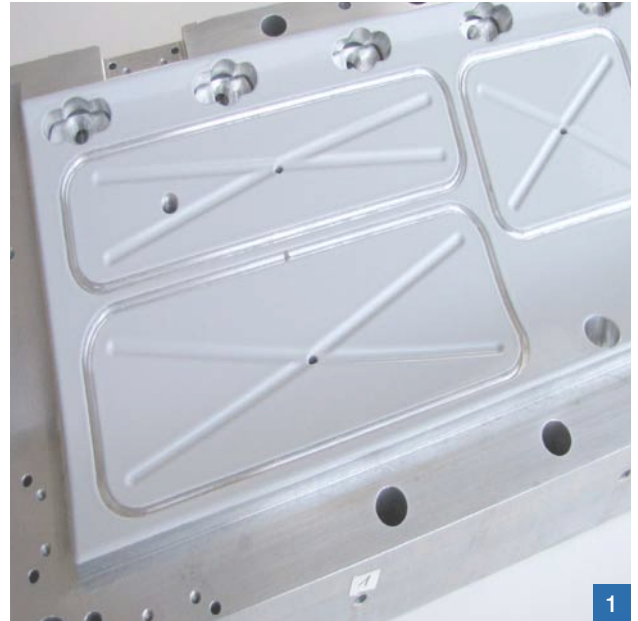

MetaLine Repair and Coating Systems

## Plastic welding

Sprayable elastomeric coatings for the protection of sensitive surfaces and for scratch and marking protection for any products to be welded. Precise, true-to-contour processing. Soft and haptic but nevertheless wear-resistant film properties

- Feed prisms
- Ultra-sonic welding tools
- Friction welding tools
- Seats / magazines
- Stops

- 1 *Precise, even coating with high static friction*
- 2 *Dashboard tool coated with 1 mm MetaLine 580*
- 3 *A typical MetaLine application – simply professional*
- 4 *Vacuum tool coated with MetaLine 590*
- 5 *Coated welding tool for passenger car rear lights*
- 6 *Variable in hardness, static friction and surface structure*
