

Transport Protection

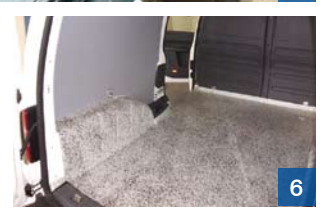

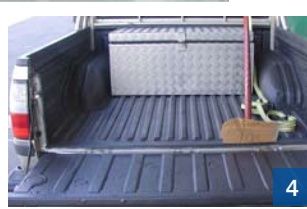

MetaLine Repair and Coating Systems

Vans Pick-Ups

Elastomeric coating to be applied by spraying or by means of brushes or trowels for permanent surface protection. Very decorative, variable static friction, self-applicable. Multifunctional as slip protection/transport protection or slip-enhancing for bulk goods or the use of tippers

- Pick-Up-Trucks
- Street sweepers
- Municipal vehicles
- Car trailer
- Caravans
- Seats

- 1 Individually adjustable multifunctional coatings
- 2 By far more than just a structured, flexible "rhinoceros skin"
- 3 MetaLine coatings are permanently highly elastic
- 4 Seamless self-applicable permanent surface protection
- 5 Variable static friction, structure, thickness, color, hardness . . .
- 6 MetaLine – a brand-new idea in bi-color terrazzo optics

Load Protection

MetaLine Repair and Coating Systems

Transporters Light trucks
